

Scia Desk... Protect, Backup, Share, Synchronize

One solution, whatever the challenge.

“Keeping our data secure, synchronized, backed up and available was expensive and required in-house IT expertise.”
 “Whether we are online or offline, working at the office or on the road, Scia Desk allows our teams to securely share and synchronize data with no limits, or new interface to learn.”

“Millions of people risk losing their unprotected, critical data every day.”

Synchronize

Having your critical files scattered across multiple computers can make them difficult to keep track of and easier to lose. Scia Desk eliminates the risk by providing a Fileserver to securely consolidate your valuable documents, back them up and synchronize them across multiple computers.

Share

Scia Desk provides a cost effective, easy-to-use and secure solution for businesses to share files inside and outside the company. Share access to Fileservers with team members and collaborators, allow read-only access to members outside your team and use FolderLink and FileLink to share files and folders via email.

Mobile Access

View, share and access your files on-the-go. We tackle your challenge of mobile device support. If you have another device, just use your mobile browser and access your files at <http://sciadesk.com/m> or <https://mysciadesk.com> via any browser.

Unlimited* Backup

Hard drives crash and computers get stolen or lost. Protect your valuable data from suffering the same fate. Everytime a file is changed or a new file is saved on the Scia Desk Fileserver, it gets backed up to the cloud. Since your files are backed up to redundant servers in the cloud, Scia Desk provides instant disaster recovery.

Protect

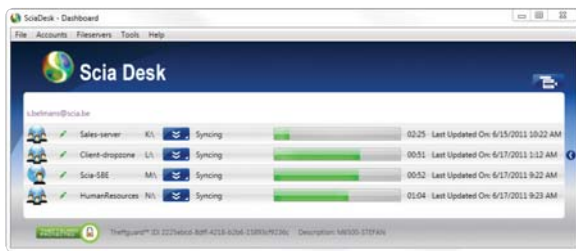

Your files are important to you and many can be confidential. With Scia Desk, you can be confident no one will have access to your critical files unless you authorize them. By securing them locally with 256-bit encryption and giving you the power to “shred” the local files remotely and even locate your lost or stolen mobile device using Theftguard™, Scia Desk is the most secure solution.

Instantly share files & collaborate

New and changed files automatically appear on your team members' computers

Work as you normally would

Use Scia Desk just like you use Windows Explorer or the Mac Finder

On demand shared spaces

Separate different projects and different teams by creating multiple Fileservers

Access files anytime, anywhere

No tedious file transfers, VPN, or reliance on Internet connections

Get started quickly

No need to call IT specialists to include new team members on your project

Automate your file back-ups

Any file on your Fileserver is automatically backed up online

Data is local and backed up online

Files are local on your computer, and stored at our data center, with full back-ups, redundancy, and security

Affordable

Scia Desk is the most affordable way for SMBs and Mobile professionals to secure, back up and share data. Scia Desk offers all the benefits of a VPN, FTP and backup system without the infrastructure investment. Scia Desk eliminates the cost of expensive servers, complex software or need for IT expertise.

Data is locked away and encrypted

The files on your computer are always securely encrypted when logged out

Your files stay confidential

With Theftguard, files on your computer are automatically destroyed when you report your computer lost or stolen

* Subject to fair use policy <http://www.sciadesk.com/fair-use>
